DETAILED ACTION

Remarks

This Office Action is in response to Applicant's amendment of 8/30/04. By the amendment:

Claims 1, 7, 13, 19, and 25 have been canceled.

Claims 2, 8, 14, 20, and 26 have been amended.

Claims 2-6, 8-12, 14-18, 20-25, and 27-32 are now pending.

Allowable Subject Matter

Claims 2-6, 8-12, 14-18, 20-25, and 26-32 are allowed.

The following is an examiner's statement of reasons for allowance: By the amendment, claims previously indicated as having allowable subject matter have been rewritten in independent form including all of the limitations of the base claim and any intervening claims. As previously stated in the prior office action, although the prior art of record in combination would suggest the use of a polarization controller having a twist in order to rotate a linear polarization to circular polarization and also in reciprocal, the prior art of record fails to show or to suggest a current sensor comprising of all the elements as presently claimed wherein the distance from the twist to the first end of the birefringent fiber being approximately an odd multiple of one quarter of a beatlength
